

Identify a quality you could develop further

Identified quality: ability to maximize opportunities

Why this quality: Although I believe I am already able to get a lot out of the opportunities presented to me, I do believe I leave some opportunities which, if maximized, can bring a lot of success. For example I did not ask for an recommendation after I completed my traineeship even though my supervisor was very happy about my work.

Describe three concrete actions to improve this quality

- Ask for a reference (on my LinkedIn profile) to my academic and external supervisor after my presentation at the European Economic and Social Committee.
- In my next job interview ask about the opportunities for personal development.
- Propose my thesis results tomorrow at a meeting of a political party about education.
